### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 9-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

### *Information Disclosure Statement*

2. The information disclosure statement filed 1/14/03 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Plaquin et al.

In regard to claim 1, Plaquin et al. discloses (fig. 7) a pipe assembly connection comprising a seated connector having a first cylinder section (section of outer tube where threads 84 are located) contiguous with a first lipped portion (sloped section between 84 and 84'), the

Art Unit: 3679

first lipped portion being contiguous with a second cylinder section (outer portion where 84' is located);

and

a base 81 having a threaded end 83' for threaded connection within the seated connector.

In regard to claim 2, the second cylinder section is contiguous with a second lipped portion 82.

In regard to claim 3, the second lipped portion is contiguous with a terminal section (right most section of the outer tube in fig. 7).

In regard to claim 4, the second cylinder section of the seated connector contains threads 84' for direct threaded connection with the base 81.

In regard to claim 5, the first cylinder section is of wider diameter than the second cylinder section.

In regard to claim 7, the threaded end 83' of the base is squarely threaded.

In regard to claim 8, the end of the base 97 is beveled.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Plaquin et al. in view of Singleton.

Art Unit: 3679

Plaquin et al. discloses a pipe assembly as described above. However, Plaquin et al. does not disclose that the threads on the base are triangular. Singleton teaches using triangular threads on a pipe assembly connection in order to facilitate a backing off of the separate pipe components. Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify the threads of Plaquin et al. to include triangular threads, as taught by Singleton, so that a pipe assembly connection could be created which could be easily separated when upon disassembly.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carlin et al., Chelette et al., Blose et al., Bollfrass et al., and Blount et al. all disclose similar pipe assemblies common in the art.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David E. Bochna whose telephone number is (703) 306-9040. The examiner can normally be reached on 8-5:30 Monday-Thursday and every other Friday.
